

**BOSCH**

Invented for life

Standardized PM Kits for your GKF 2600

Go for increased equipment availability.
Go for Kits.

Your packaging machine is subject to a natural and successive wear under usual production conditions.

Based on technical know-how and market experience, Bosch has defined wear parts which need to be exchanged regularly.

Bosch preventive maintenance Kits (PM Kits) are spare parts packages developed and compiled by Bosch experts. They reduce the risk of unexpected downtime and strive for continuous equipment availability.

With the correct parts on site you are able to perform your regular planned maintenance work fast and efficiently. An overview of PM Kits available for your packaging machine can be found in the following.

If you are interested, we would be glad to offer you an individual maintenance concept with scheduled Bosch service assignments.

Your benefits

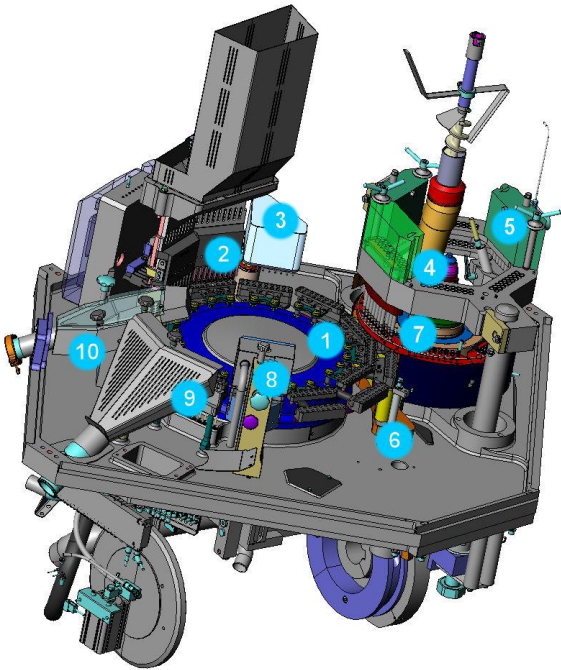

- ▶ Reduced inspection costs
- ▶ Reduced storage costs
- ▶ Optimized planned downtime
- ▶ No time-consuming maintenance preparation
- ▶ PM Kits documentation via E-Portal

GKF 2600 ASB 100%

Standardized PM Kits

GKF 2600

Standard PM Kits are available for following

PM Kits Description GKF 2600		PM Kit material number	Recommended replacement frequency	Set-Up-time	Page No.

Further information

E-Portal login:
PM Kits can be ordered via the E-Portal: www.boschpackaging.com/ePortal

Service technician:
We recommend a Bosch service technician for your regular maintenance intervention.

Order information:
PM Kits are available per assembly group. Please provide the serial number of your machine and the relevant PM Kits you are looking for when requesting a quotation. For more details please get in touch with your local partner.
For example: GKF 2600 | 711617MS2009 | Segment Rotation | Powder Dosing Station

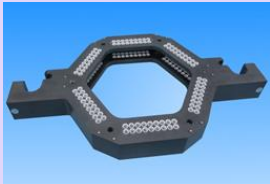

Note:
Recommended replacement frequency is for guidance only and may vary depending on the product type, environmental conditions and other variables. Please note that every type of applicable PM Kits for assembly groups is designed specific and therefore not suitable for every machine. For technical information, please contact us and we will happy to advise on the options availability for your machine.
